### ANTERIOR CROWN PREPARATION

## 3-Unit Bridge Restorations

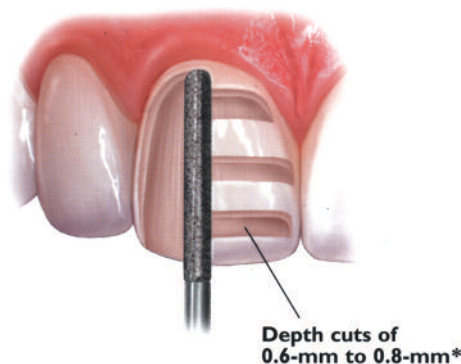

### 3-UNIT BRIDGE PREPARATION

## Veneers

### VENEER PREPARATION

A medium grit, round-ended, diamond bur is used to remove a uniform thickness of facial enamel by joining the depth-cut grooves.

### INCISAL PREPARATION

The diamond bur is angled to bevel back the incisal edge.

### CHAMFER MARGINS

Correct preparation of the chamfer margins interproximally allows the appropriate bulk of porcelain.

\*Please note: For additional masking capabilities and/or layering techniques, further reduction may be necessary. Contact your laboratory for further information.

### POSTERIOR CROWN PREPARATION

### CONVENTIONAL CEMENTATION PREPARATION

When layered or pressed ceramic margins are preferred in conjunction with a zirconia framework, enhanced gingival esthetics can be achieved with a definitive 90 degree shoulder preparation.
